50 leading Indonesian universities for international collaboration

2021 - 2022

Background and Objective

To assess transnational education (TNE) opportunities for UK universities in Indonesia, the British Council conducted studies comprising extensive desk-research and face-to-face interviews with key stakeholders in Indonesia. The result was a report on Indonesia TNE landscape published in October 2019 which can be downloaded here:

https://education-services.britishcouncil.org/sites/siem/files/field/file/news/Indonesia_TNE_report.pdf.

The 2019 report is intended to assist UK universities to better understand the regulatory environment in Indonesia and to provide an overview of the main trends, challenges and opportunities that exist in this increasingly important higher education (HE) market. With over 4000 higher education institutions (HEIs) dotted across the country, it is always a challenge to navigate Indonesia HE landscapes. This profile of 50 Indonesian universities is intended to support UK universities with a tool to get to know selected Indonesian universities that have capabilities to develop academic and research partnerships with international partners.

Methodology

This profile is written based on publicly available information collected through desk research. While the universities' websites and newsletters are great sources of information, some are not maintained and updated regularly (almost all of them are written in Indonesian language). Therefore, there might be some gaps in this document, and we welcome any feedback both from UK and Indonesia readers. We are planning to publish a second edition of this profile to incorporate the feedback and further research.

This list of 50 Indonesia universities is not a ranking, we don't score them. We compile the list from two broad categories, namely:

- Public universities: 23 institutions including 12 public autonomous universities.
- Private universities: 27 institutions including faith-based universities and universities that are founded by or have close links with prominent Indonesian companies or a business group.

Following Ministry of Education's advice, we only include in this list universities which are rated Excellent and Very Good by Indonesian National Accreditation Agency for Higher Education (BAN-PT). BAN PT plays an important role in assessing the quality of higher education in Indonesia. The quality assessment process starts with self-evaluation by the university and ends with rating by BAN-PT. The ratings, from highest to lowest, are Excellent, Very Good, Good, and Fail / Not Accredited. Universities are assessed in terms of their institutional capacity and effectiveness in education delivery. BAN-PT looks nine aspects including university's vision and mission, governance, students (e.g. admission and support system), human resources (academics and staffs), finance and facilities, education delivery (e.g. curriculum and university quality assurance), research, community services, and outputs (e.g. graduate quality, tracer study and feedbacks from wider stakeholders) (https://www.banpt.or.id/wp-content/uploads/2019/09/Lampiran-01-PerBAN-PT-3-2019-Naskah-Akademik-IAPT-3_0.pdf).

The Profile

The profile is structured into three different sections:

- Facts and figures which include student body (domestic and international), number of academic staff and their educational background, accreditation (national and international) and office for international affairs.
- Key information related to TNE which includes existing TNE partnership/s, name of overseas partner/s, programmes/fields of study, delivery models (3+1, 1+1 etc) and classes taught in English.
- Research capability and centre

Table 1: List of 50 Indonesian leading universities and their current TNE partnerships

Key Takeaways

- While Indonesia is an important market of international students for UK universities (Indonesia is a priority country as per the UK's International Education Strategy), TNE in Indonesia is relatively underdeveloped.
- Nevertheless, an increasingly favourable policy and regulatory environment, combined with positive perceptions of UK universities, provides opportunities for the UK to expand its TNE presence in Indonesia.
- In October 2018 the Ministry of Research, Technology and Higher Education (RISTEKDIKTI) signed a regulation paving the way for the establishment of international branch campuses (IBC) in Indonesia.
- In April 2019 the Ministry gave approval to a dual degree programme with blended approach of face-to-face and online delivery between Indonesia and an overseas university in which the overseas partner is responsible for online delivery.
- Triggered by the global pandemic and campus closures, online learning is becoming more acceptable and applicable according to a 2020 survey by the Ministry involving a quarter million university students across Indonesia (Potret Pendidikan Tinggi di Masa Covid-19 or Portrait of Higher Education in Covid-19 Time, Kemdikbud – Ministry of Education and Culture).
- The Ministry's increasing acceptance of blended-learning provision and online delivery is a positive development and could expand the TNE target market into the working professional population and also potentially reduce the requirement for UK universities to send fly-in faculty to Indonesia.

- All these changes are indicative of a slow but steady trend towards increased internationalisation of the HE system in Indonesia.
- Looking at profiles of 50 Indonesian universities included in this publication, some trends are emerging:
 - It appears that articulation/progression, such as 3+1, 2+2, 1+1, is the most common delivery model for many existing TNE programmes in Indonesia. It usually involves dual-degree arrangement although there might be cases where students will only get one degree.
 - There are more TNE offers at UG than PG level. This might be due to the fact that many universities are now offering classes taught in English, commonly termed as IUP or International Undergraduate Programmes. The quality of classes taught in English varies from one university to the other. For more detail on this aspect, please refer to the British Council report on the use of English as a medium of instruction in Indonesian universities published in 2021: <https://www.britishcouncil.id/en/programmes/education/emi-higher-education-institutions>
 - TNE programmes, aimed at the working professional market, and with a flexible approach to delivery, are perceived as offering good value.
 - TNE programmes offer a variety of courses from chemistry to creative industry. Business, including management and accounting, is the most common course currently on offer. Engineering, communications, education, and design are also popular.
 - Australia is currently the main player in Indonesia TNE market with offers including articulation/progression, dual degree, and a branch campus. Monash is the first university to open a branch campus in the outskirts of Jakarta. In October 2021, Monash University, Indonesia welcomed its inaugural cohort of master's students starting in the future-focused fields of Data Science, Public Policy and Management, Urban Design and Business Innovation. A second Australian university is currently planning to open a branch campus in Indonesia

EMI – English Medium Instruction

As part of its International Undergraduate programme, ITS offers variety of courses thought in English including:

- Engineering
- Urban planning
- Statistics
- Physics
- Maths
- Chemistry
- Business management
- Architecture

TNE

UNIVERSITY	COUNTRY	UG / PG	PROGRAMME	DELIVERY

EMI – English Medium Instruction

IPB has three EMI classes which also offer students international mobility opportunity. Students on EMI classes can spend up to one year at partner university to study veterinary medicine at University of Edinburgh, agroindustry at Rhein Waal University in Germany, and food technology at Universiti Sains Malaysia.

TNE

EMI – English Medium Instruction

UNDIP has several EMI programmes which also offer UG students international mobility. Students have the chance to study and earn credit at partner universities such as Flinders University, Australia (Laws), Ateneo de Manila University, Philippines (Communication), Curtin University, Australia (Public Administration), Myeongji University, South Korea (Business Administration).
